

ASSIGNMENT :- 2 Ad Java

Write a java program to display various shapes with colors using JFrame and Applet.

```
import java.applet.Applet;
import java.awt.*;
```

```
Public class ShapeApplet extends Applet {
```

```
    public void paint(Graphics g) {
```

```
        // Rectangle
```

```
        g.setColor(Color.RED);
```

```
        g.fillRect(50, 50, 100, 60);
```

```
        // Oval
```

```
        g.setColor(Color.BLUE);
```

```
        g.fillOval(70, 50, 100, 60);
```

```
        // Line
```

```
        g.setColor(Color.GREEN);
```

```
        g.drawLine(50, 150, 300, 150);
```

```
        // Circle
```

```
        g.setColor(Color.ORANGE);
```

```
        g.fillOval(150, 180, 80, 80);
```

```
    }
```

```
}
```

```
</html>
```

```
<body>
```

```
    <applet code="ShapeApplet.class" width="400" height="400"></applet>
```

```
</body>
```

```
</html>
```

```
import javax.swing.*;
```

```
import java.awt.*;
```

```
Public class Student Register extends JFrame {
```

```
    JLabel l1, l2, l3, l4;
```

```
    JTextField t1;
```

```
    JTextArea ta;
```

```
    JComboBox c1;
```

```
    JRadioButton r1, r2;
```

```
    ButtonGroup bg;
```

Student Register ()
{

setTitle("Student Register form");

setSize(400, 350);

setLayout(null);

l1 = new JLabel("Name");

l1.setBounds(50, 30, 100, 30);

add(l1);

t1 = new JTextField();

t1.setBounds(150, 30, 150, 30);

add(t1);

l2 = new JLabel("Address");

l2.setBounds(50, 80, 100, 30);

add(l2);
